A motivated and detail-oriented recent master's in Computer Application from Harcourt Butler Technical University, specializing in Full stack development. Proficient in multiple programming languages and frameworks, with hands-on experience in developing user-centric web applications. Demonstrates strong problem-solving skills, teamwork, and a keen desire to continuously learn and adapt in a dynamic technological landscape.

SKILLS

Programming Languages: C, C++, Python, JavaScript

Frameworks & Libraries: Tailwind CSS, React JS, Django

Databases: SQL

Tools: VS Code, MySQL, MS Word, PowerPoint, Postman, PyCharm, MySql Workbench

WORK EXPERIENCE

TECHAHEAD SOFTWARE

Full stack Intern

July-2024 – Sep-2024

As a Full Stack Developer Intern at TechAhead Software, I focus primarily on backend development using Python, SQL, and Django. My work involves creating and managing back-end functionalities, handling data storage, and ensuring smooth integration with the front-end. I also help build dynamic user interfaces with HTML and CSS, and work closely with the team to deliver high-quality software solutions while learning and adapting to new technologies.

PROJECTS

TODO APP

July 2024

- Developed the backend of a To-Do application using Django, focusing on implementing robust user authentication and task management functionalities. Key features include user registration, login, and logout, alongside comprehensive task management capabilities such as creating, deleting, updating, and viewing tasks. Utilized Django's ORM to interact with an SQL database, ensuring efficient data storage and retrieval. This backend solution ensures secure user sessions and reliable task operations, demonstrating strong proficiency in backend development and database management.

[Github Link](#)

E-COMMERCE WEBSITE

May 2023

- Designed and developed an e-commerce platform for browsing and purchasing clothes, with features for shopping cart management and discount application.

[Live Demo](#)

RANDOM GIF'S GENERATOR

June 2024

- Developed a Random Meme Generator using React, which involved designing a web application that fetches and displays random GIFs from an API. Implemented efficient API calls to ensure quick loading times and a smooth user experience. Utilized React hooks and state management to handle dynamic content updates, optimizing both performance and interactivity.

COURSES & SUBJECTS

Job Ready Bootcamp in C++ and DSA

iNeuron, 5th Apr 2023

- Comprehensive understanding of C and C++ languages, concepts of algorithms, and problem-solving skills.

Web Development

Udemy, 25th Mar 2023

- Comprehensive understanding of C and C++ languages, concepts of algorithms, and problem-solving skills.

EDUCATION

HARCOURT BUTLER TECHNICAL UNIVERSITY

Kanpur, UP

Master's of Computer Applications (7.80 / 10)

2022 – 2024

MDU ROHTAK(SDINT COLLEGE)

Haryana, Faridabad

Bachelor's of Computer Applications (69.63 %)

2018 – 2021
