OBJECTIVE

Software Developer with experience in C++, Qt Framework, Linux, Python, and Django, specializing in simulation systems, backend development, and API design. Passionate about building reliable, high-performance applications, solving complex problems, and continuously learning new technologies.

EDUCATION

Harcourt Butler Technical University (HBTU)

Kanpur, Uttar Pradesh, India

Master of Computer Applications (MCA); CGPA: 7.8

2022 – 2024

Maharshi Dayanand University (MDU)

Rohtak, Haryana, India

Bachelor of Computer Applications (BCA); Percentage: 69%

2018 – 2021

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript, C

Frameworks & Libraries: Qt Framework, Django, React.js, Node.js, Express.js

Frontend Development: HTML, CSS, Tailwind CSS, Bootstrap

Backend Development: RESTful APIs, Token Authentication

Databases: MySQL, PostgreSQL, MongoDB, SQLite

API Development & Testing: REST APIs, Postman

Development Tools: Qt Creator, VS Code, PyCharm, Git, GitHub, MySQL Workbench

Operating Systems: Linux, Windows

Productivity Tools: MS Excel, MS Word, PowerPoint

Soft Skills: Problem-Solving, Analytical Thinking, Collaboration, Communication

WORK EXPERIENCE

Software Developer (Product Development)

Oxygen to Innovation (O2i), Noida

May 2025 – Present

- Developing defense simulation modules using **C++** and the **Qt Framework** on Linux.
- Implemented **ScriptEngine** features using **AngelScript** for simulation automation and scripting.
- Developed and enhanced **Sonar** and **EO/IR Sensor** functionalities for real-time simulation.
- Worked on database integration, feature development, debugging, testing, and performance optimization.
- Prepared technical documentation and project help guides using **Sphinx** and the **Read the Docs** theme.

Full Stack Developer Intern

TechAhead Software, Noida

July 2024 – Jan 2025

- Developed and maintained backend APIs using **Python**, **Django**, and **MySQL**.
- Built RESTful APIs and implemented authentication, validation, and database integration.
- Performed API testing and debugging using **Postman** and **PyCharm** to ensure reliability.
- Collaborated with cross-functional teams to deliver scalable and high-quality backend solutions.

PROJECTS

- **Smart Study Planner & Focus Tracker (July-26):** Developed a Linux desktop application using **C++17**, **Qt6**, **SQLite**, and **OpenCV**. Implemented AI-powered focus tracking, Pomodoro timer, task management, analytics dashboard, and a modular MVC architecture with real-time database integration. [GitHub](#)
- **Social Media Backend (Aug 2024):** Developed the backend for a social media application using Django. Implemented secure user authentication, tagging, blocking, and a real-time notification system. Integrated temporary account deletion with reactivation logic and scheduled permanent deletion. Used Django ORM with MySQL for efficient data handling. [GitHub](#)

CERTIFICATES

- **Job Ready Bootcamp in C++ & DSA** — iNeuron (Apr 2023): C, C++, data structures, and problem-solving techniques using C++.
- **Web Development Certification** — Udemy (Mar 2023): Hands-on experience with HTML, CSS, and JavaScript.
